

How do I connect

I have a TV with two scart sockets and also a DVD player, a Video Recorder and a Freeview Box. How should I connect them?

Panasonic ideas for life

Aerial Cable

Scart Cable

Note: Although the diagram features a Freeview box, it could also potentially be a satellite or a cable box. If it was either of the latter then note an additional RF cable would be required connecting to the respective box from either the dish or cable supply point.
